CLEAN BEAUTY

MAKE SCENTS

There's pleasure to be found in discovering a sustainable and stylish alternative to your everyday essentials. With refillable natural deodorant from ET2, makes a mundane moment that little bit more satisfying. And while its colourful packaging and five 100 per cent natural fragrances are fun, it's more than just style over substance.

RED HOT INGREDIENT

Is red pepper the latest super-ingredient? Erboriani's two new red pepper radiance-boosting products re-energise the skin using Calcium ammonium extracts that won't cause irritation. The Red Pepper Pulp Gel Cream, £45, includes niacinamide and hyaluronic acid to illuminate and plump skin, while the Red Pepper Paste Mask, £37, will leave an instant glow from the pulp-enzymes and liquorice root extract.

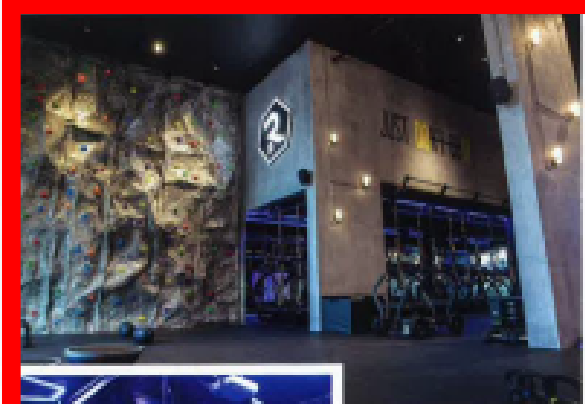

Lip service

Just for joining the waiting list for the next batch of High lipsticks, a £1 donation will be made towards cleaning up ocean plastic. As a company, High offsets all its daily emissions and uses only 100 per cent solar energy. Made from clean, sustainable ingredients, and available in an edited selection of shades, the lipstick lid has a handy mirror for perfect application, too. Also try responsibly sourced and packaged Burr's Best Tinted Lip Oil, £10, made with all-natural ingredients. [Highcosmetics.com](#)

NATURAL BOND

Six years in the making, Aveda's bond-building Botanical Repair helps naturally restore damaged hair. With three new plant technologies, plant-powered molecules and ingredients such as saccha inchi, avocado and green tea, hair bonds are repaired from the core of each strand. Created for all types and textures – even coloured hair – the range includes shampoo, conditioner, two masks (light and rich) and a leave-in treatment.

OFFSET YOUR FITNESS

Rumble Gym is London's first carbon-neutral gym. It offers a variety of classes including HIIT, boxing and climbing, and for every workout you attend, Rumble will plant a tree to offset the impact, via its #onetreetoatime initiative. The ultimate workout incentive. [Rumble-gym.com](#)

Skin de-stress

Garnier's latest organic products – Multi-Restore Hemp Gel Cream, £9 (packaged in Garnier's first-ever paper tube), and Multi-Restore Hemp Sleeping Oil, £12 – will help soothe and repair stressed-out skin. Using a concentrate of pure hemp seed oil, the formulas are designed to be used in tandem (the gel cream in the morning and the oil at night), and results are evident in as little as two weeks.

LITTLE CHANGES

Single-use plastic cotton buds have a lasting impact on the environment, so switch to 100 per cent biodegradable The Humble Co swabs, £2 for 100, made from bamboo and organic cotton. Also try reusable cotton pads and face wipes from Face Halo, which can be washed up to 200 times.
